

## **Tidy School Project**

Monday 7<sup>th</sup> October sees the launch of our Tidy School Project.

Respect for the environment is a global issue and is of the utmost importance in our own school community.

We will be spending time ensuring our school environment both inside and out is the smartest and tidiest it can be.

We want to ensure everyone takes pride in school environment and we are taking many steps to ensure this.

One of our priorities is to educate pupils with regards to keeping places clean and tidy and the impact litter can have on the environment. This has been a focus for a week in assemblies and will be examined in more detail in Tutor periods through our PSHCE sessions.

On Monday, everyone in the school will be taking part in the Big Clean in order to rid the outside of the school building of any litter and rubbish. All pupils will be given a designated area to focus on and remove and litter. There is a buzz amongst many of our students who are keen to set up environment/litter teams.

For info, Year 7 and 8 will be responsible for the school field so will need wellies or other footwear to change into for this.

Thank-you for your inevitable support with this exciting project.
